

Auto Save Events

This feature creates auto events during route upload. The events created for offline devices are **“Measurement Skipped”** and **“Measurement Missed”**. The events created for both online and offline devices are **“Alarm Found”** and **“Alarm Edit.”** **“Device Alarm Acknowledged”** is created for online devices.

These auto events will be shown in event reports etc.

Step 1.	Verify that OMNITREND version 2.35 or higher has been installed. The OMNITREND version can be verified by: <ol style="list-style-type: none"> 1) Open the OMNITREND software. 2) Select “Help”. 3) Select “About”.
---------	---

Step 2.	From the main OMNITREND display screen, select “Options”, “General Settings”, “Route” and “General”.
Step 3.	Select “Enable auto status events”.
